Product Manager

Bengaluru, India • +91 9535156876 • jaimsanghavi@gmail.com • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

CSPO® certified Product Manager with **6+ years** in business analysis, product strategy, and Agile delivery for enterprise SaaS and GxP regulated SaMD applications serving **4M+ users**. Delivered features driving **50%+ user adoption growth** and **60% faster time-to-insight**. Expert in requirements gathering, BRD/FRD documentation, UAT coordination, and translating business needs into Epics, User Stories, and Acceptance criteria with audit-ready GxP compliance.

CORE COMPETENCIES

Product: Product Strategy & Road mapping | Requirements Gathering & Analysis | BRD / FRD Documentation | Epics, User Stories & Acceptance Criteria | Feature Prioritization | Gap Analysis | Design Thinking | Agile | Jira & Confluence | Figma
Leadership: Cross-functional Leadership | Stakeholder Alignment | GxP Compliance & Validation | Change Control | UAT Coordination | Go-to-Market Strategy

WORK EXPERIENCE

Business Experience Designer (Product Manager)

Mar 2025 – Present

Deloitte Studios (Deloitte USI), India

Functional SME & BA/BXD Lead for cloud-native transformation of 5 medical-grade SaMD applications serving 4M+ users across 270+ centers.

- Gathered requirements (Functional and Non Functional) for SaMD applications; produced epics and user stories with acceptance criteria for donor and staff workflows.
- Authored BRDs, FRDs, risk documents, and integration specs for SaMD applications; achieved first-pass GxP approval, cutting change control cycle time by 30%.
- Leading the Functional and Design team for the Self-Screening Center product — reducing manual staff intervention in donor vitals collection and improving throughput at plasma donation centers.
- Aligned 15+ stakeholders across solution architecture, development, testing, and validation.
- Maintained Confluence spaces with feature details, design notes, and process artifacts across 3 teams.
- Led sprint planning, refinement, and retros for 3-week sprints across 2 parallel workstreams; **maintained 90%+ story completion rate.**
- Replaced slide-deck walkthroughs with interactive Figma prototypes and AI-generated mock-ups - reduced stakeholder alignment from 4 sessions to 1.
- Built an AI-assisted agent that generates Functional Design Documents by pulling context from Jira, Figma, reference docs, and the codebase. **Produces 60% complete drafts, adopted as a firm initiative to reduce BA authoring time across teams.**
- Part of Cultural Pillar for Deloitte BXD Group driving team-building and collaboration initiatives across distributed teams

Product Manager (Senior Analyst)

Jan 2022 – Mar 2025

Edgeverve Systems (Infosys Subsidiary), Bengaluru

Owned end-to-end product lifecycle for an AI-driven process optimization and observability tool used by 50+ enterprises.

- Owned product strategy and roadmap for an AI task-mining platform; shaped **the 3-year vision based on 50+ customer interviews**, competitive analysis, and sales feedback.
- Launched a Gen AI-powered NLP feature that automates process-data analysis for enterprise clients, reducing average time from data ingestion to actionable insight by 60%.
- Led 7-member cross-functional team to deliver 5 major features including Kibana dashboards that cut POC turnaround by 85% (136 hours saved per client).
- Designed pricing models and go-to-market strategy with marketing; contributed to a 30% increase in enterprise pipeline conversion.
- Refined 400+ Jira Backlog; achieved 98% on-time delivery of high-impact features.
- Ran A/B tests on UI/UX changes, improving satisfaction scores by 40% and reducing onboarding time by 25%.
- Demoed product to Gartner, Forrester, IDC, and Everest analysts, contributing to leader position in 4 industry reports.
- Authored RFI/RFP responses contributing to 3 enterprise wins in BFSI and retail, **supporting \$20M+ ARR**.

Process Improvement Lead (System Engineer)

Jun 2019 – Jan 2022

Tata Consultancy Services, Bengaluru

- Deployed 7 RPA and Python automations for a medical manufacturing client, saving \$250K+ annually and eliminating 90% of manual data-entry errors.
- Built a VBA reporting tool that consolidated data from 5 systems into a single dashboard; enabled QA teams to catch deviations earlier, contributing to an 80% reduction in quality incidents.
- Mentored 5-person RPA team -improved sprint velocity by 30% and cut onboarding time for new analysts.
- Led UAT for automation solutions; **95% client satisfaction, secured 2-year contract extension**.
- Translated an internal automation prototype into a client-facing product with documented ROI. Recognized as the top innovation across the account.
- Authored reusable FDA-compliant reporting framework, cutting implementation time for subsequent clients by 40%.

EDUCATION

Bachelor of Technology in Mechanical Engineering

Jun 2015 – Jun 2019

REVA University, Bangalore
